

# WE ARE

## Saturday School Spring 2015 Middle/High School

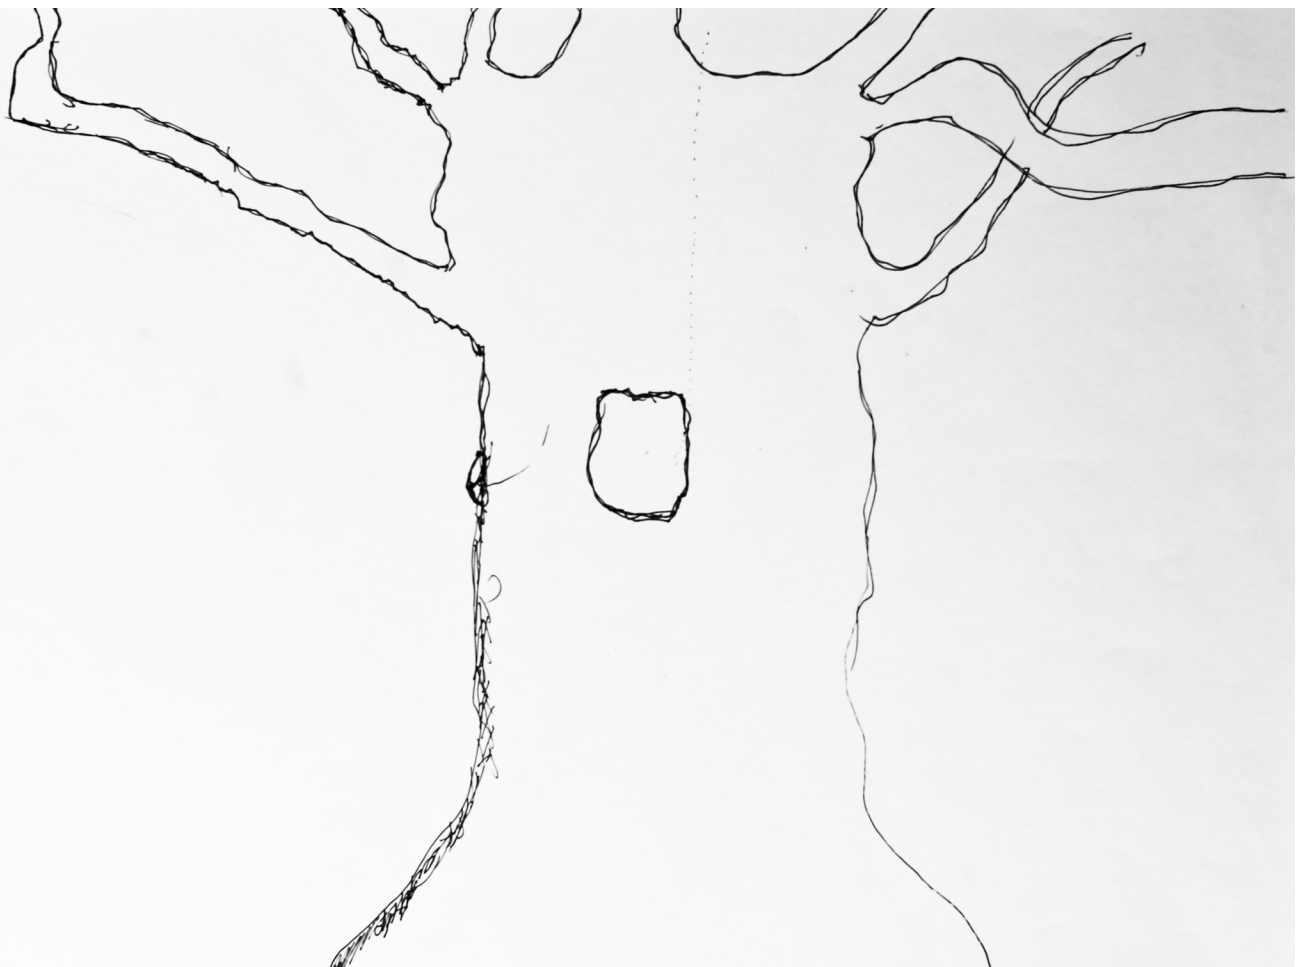

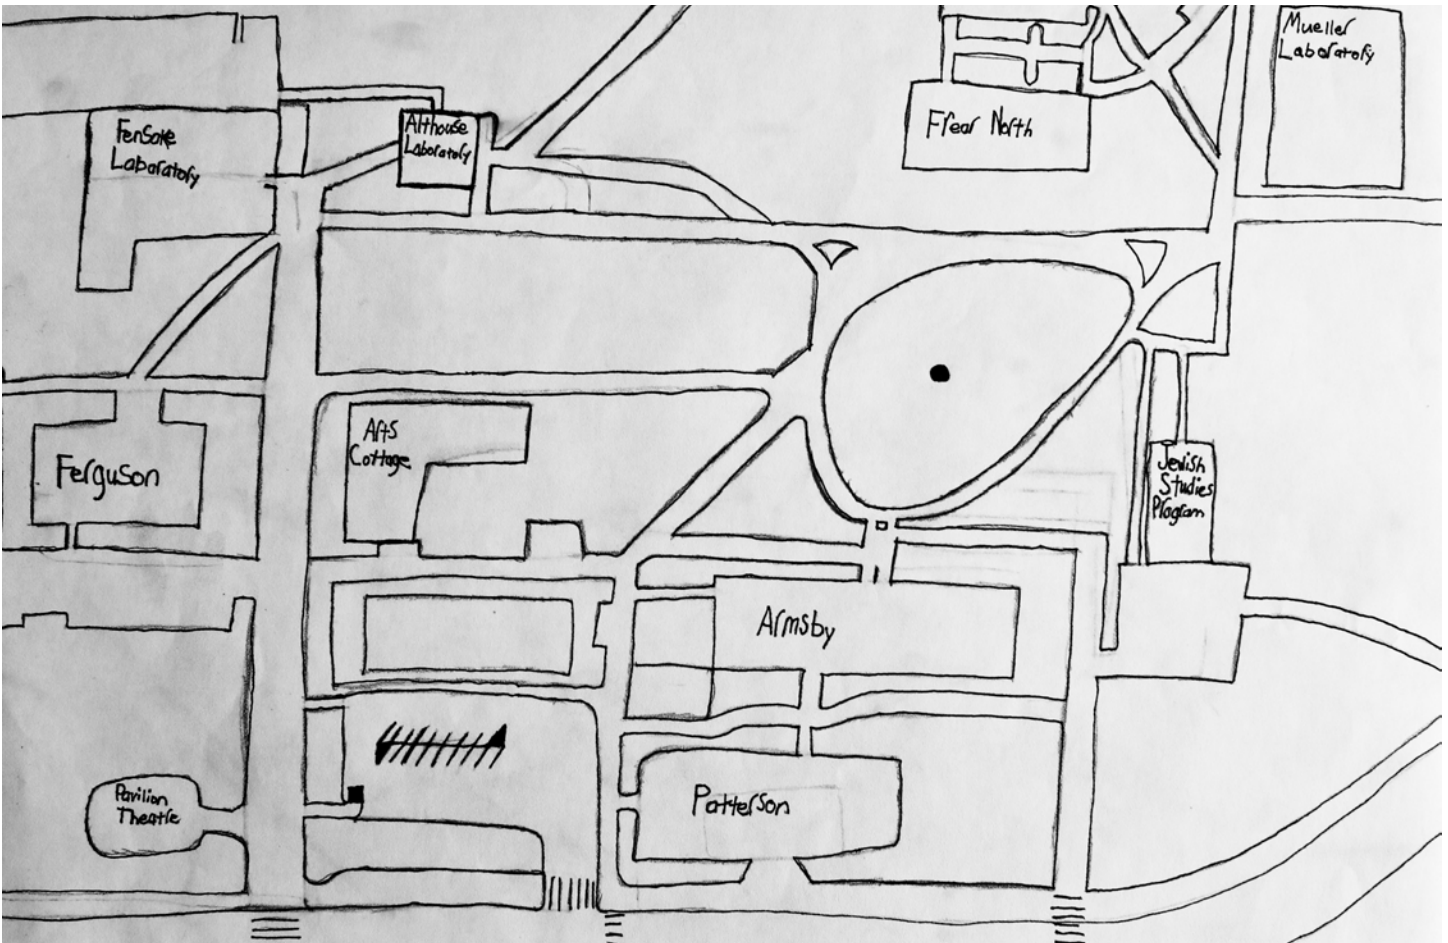

This is my home Tyrone!

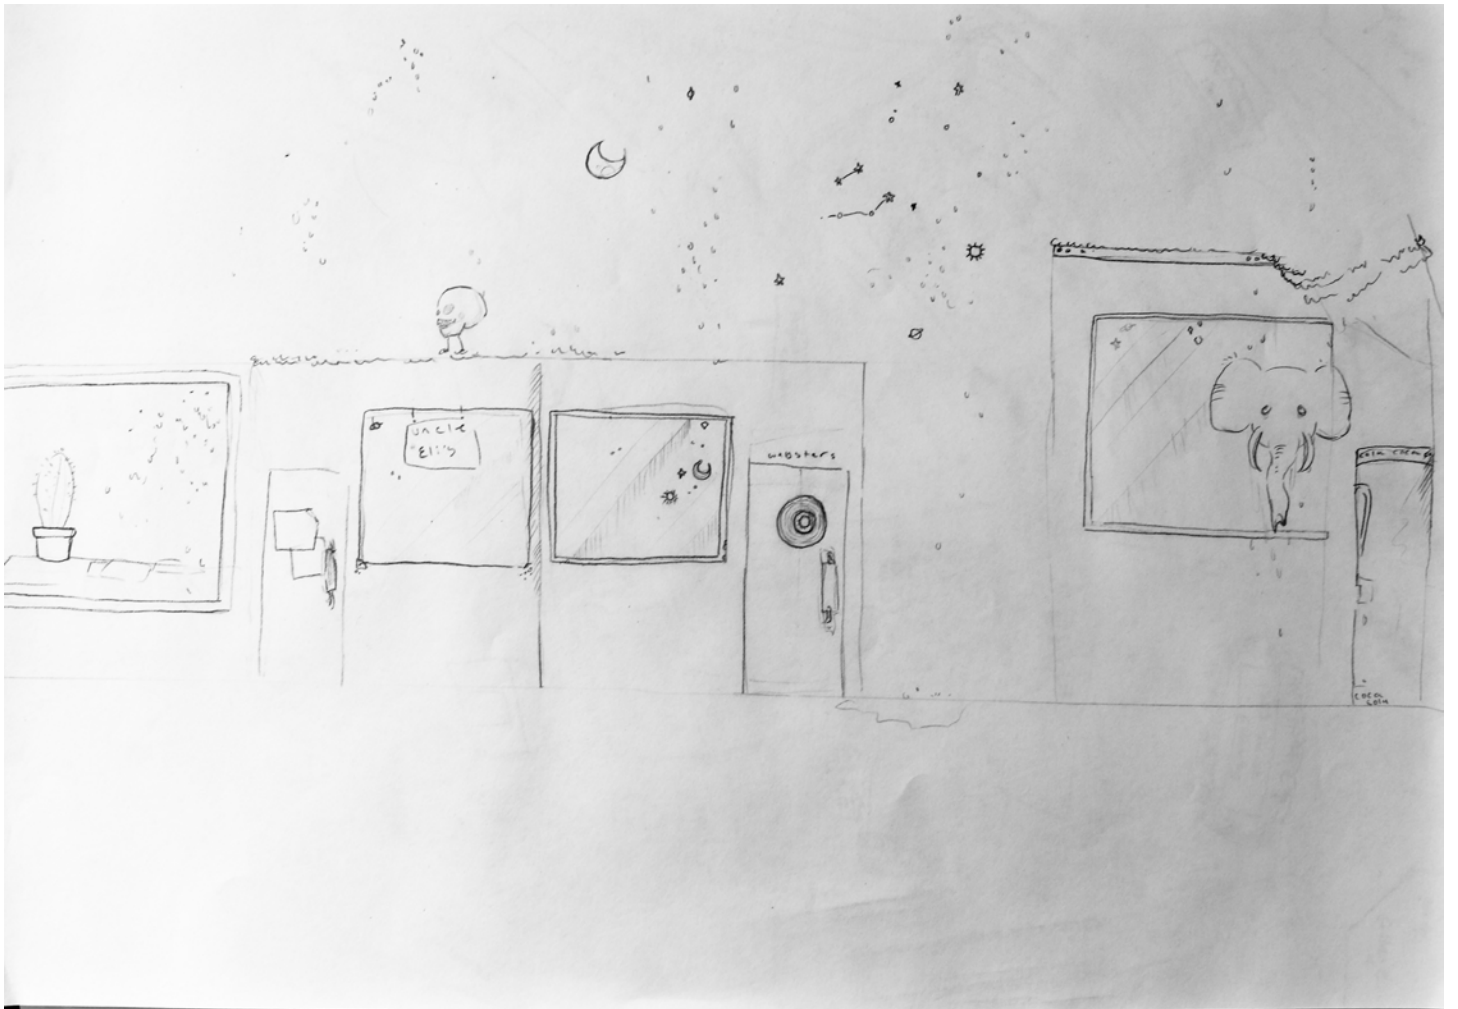

1. The first thing is Burger King. It gives me food when I am hungry.
2. The second is Gardner's Candy. When I get good grades I come here to get candy.
3. SilverscreenVideos is where I go to get movies before I buy them.
4. This is where the Football Field. People in school play here.
5. School is where I go on weekdays to learn.
6. This is my church where I go to learn about god.

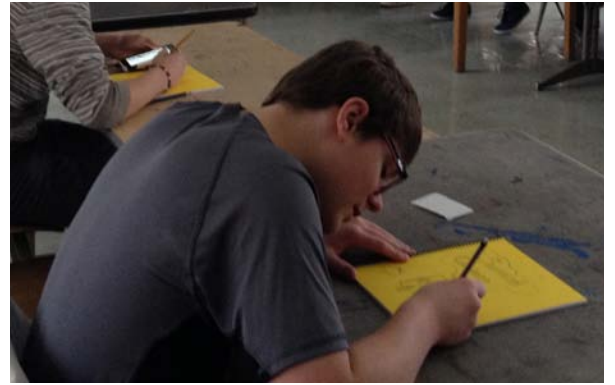

My map shows my own little neighborhood of 20 or 30 people, plus my old ~~is~~ church that is supposedly "haunted", and ~~the~~ the old school house that I helped renovate in the summer of '11. My house has tons of trees, and a barn.

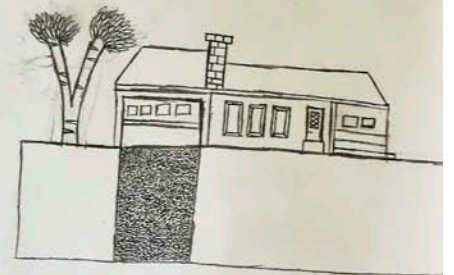

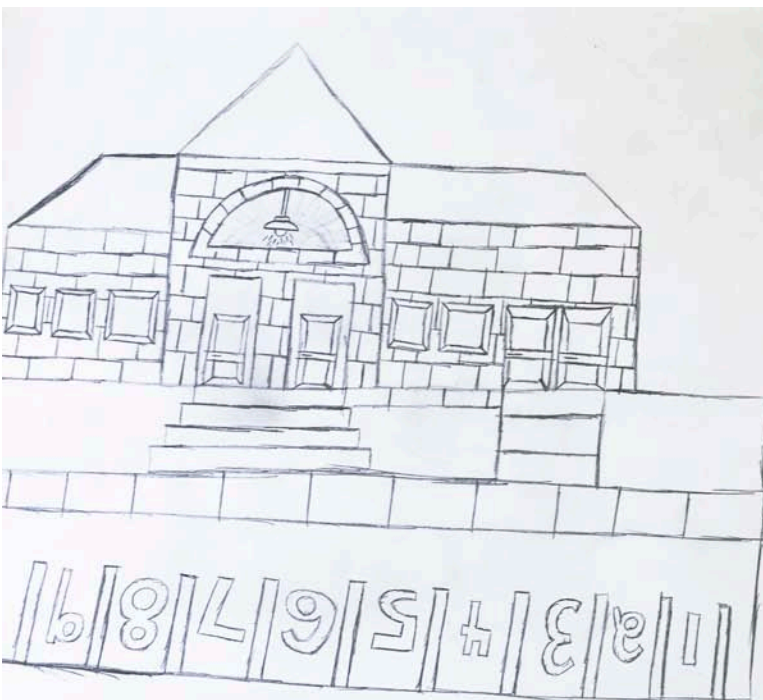

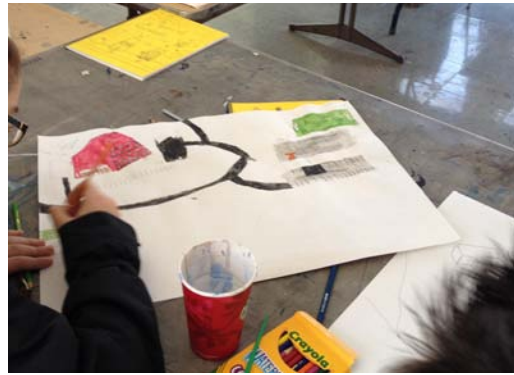

My map shows the house that I live in and the school that my mom works and where I went to elementary school.

This is a map of my hometown Tyrone. However, some places on my map are from different places but still have significant meaning to me.

1. Tyrone elementary school - this is where my mom works and where my little sister (3yrs old) goes to day-care.

2. My house - This is where me and my family live.

3. Football feild - where I do youth cheerleading and where I plan to do Jh cheerleading.

4. Tyrone area middle school - this is where I go to school as a 6th grader.

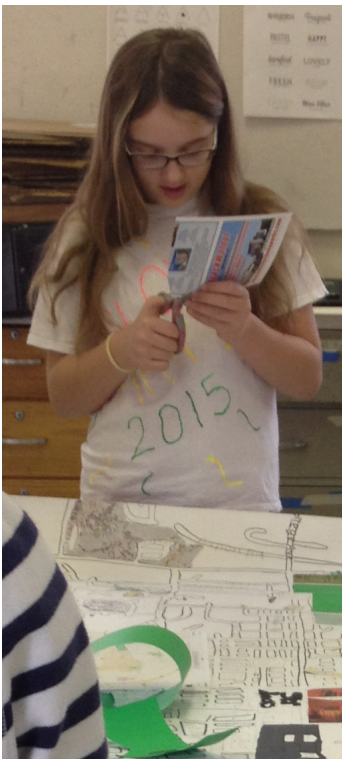

5. ~~My~~ My church - this is where I go to church

6. Dance Fusion - this is where I go to dance every thursday

7. Tyrone snyder Public Library - This is where I go to girlscouts.

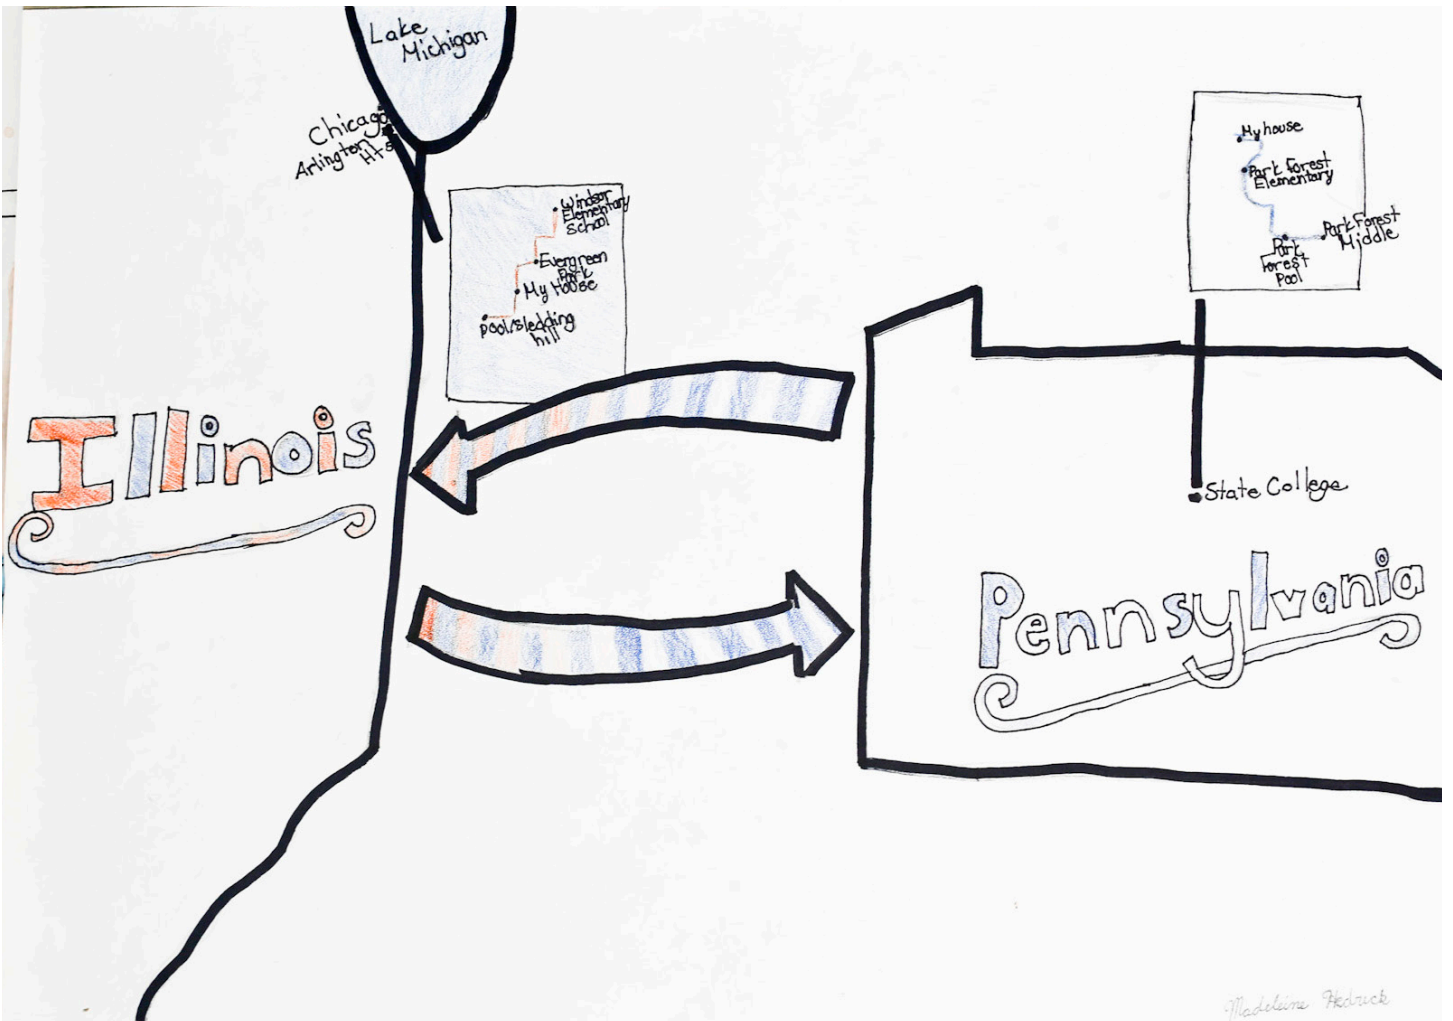

8. Arts cottage - This is where I take art class.

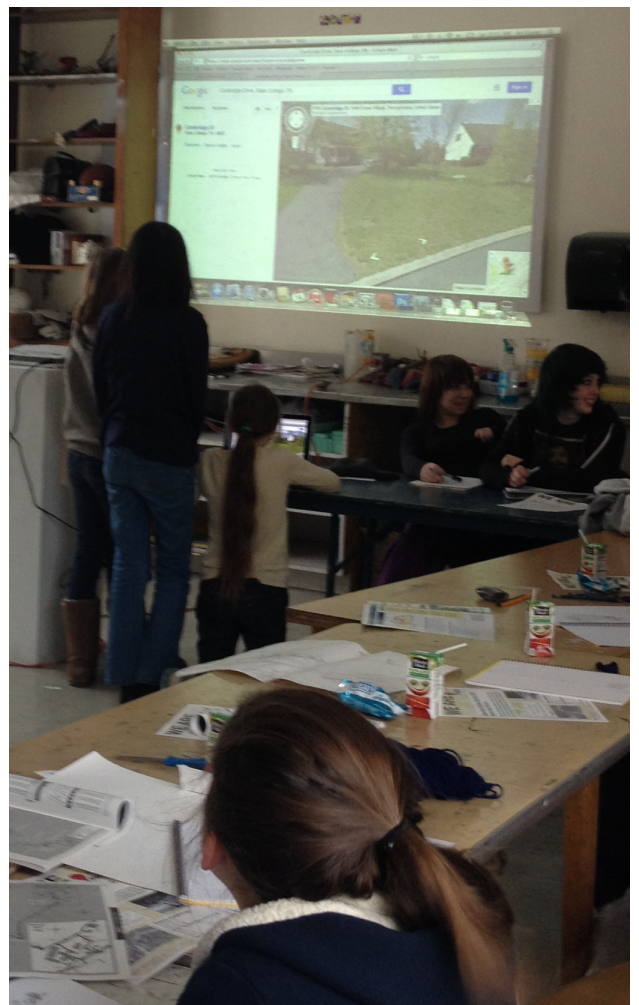

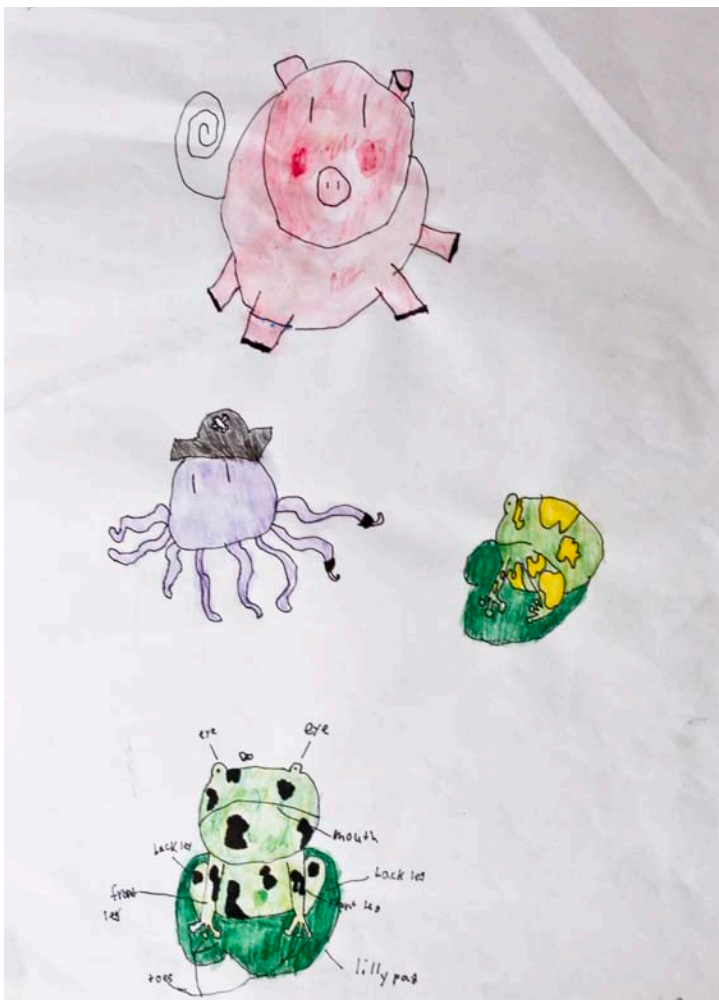

I included both of my homes in Illinois and Pennsylvania and drew the most important landmarks around it. These include the pool (which is really close), my house (obviously), my school, and a park. I wanted people to see the places that I come from.

On my personal map I drew a couple of frogs, and on one of them I labeled the different parts of it. When people look at this I want them to be happy and enjoy the pictures. I decided to draw the frogs because they are one of my favorite thing to draw.

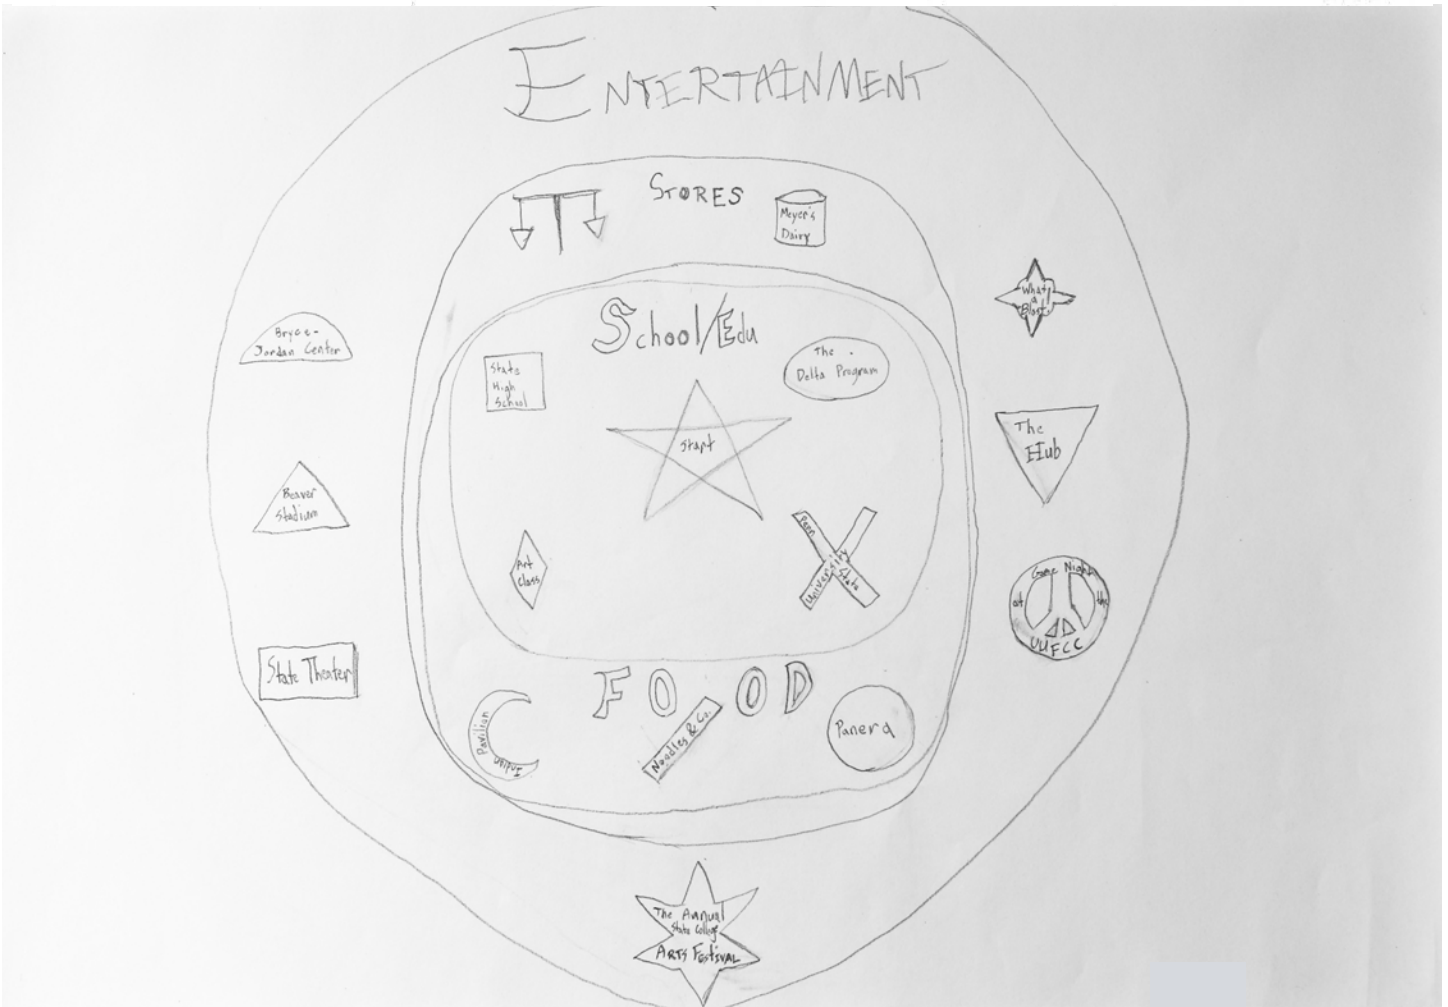

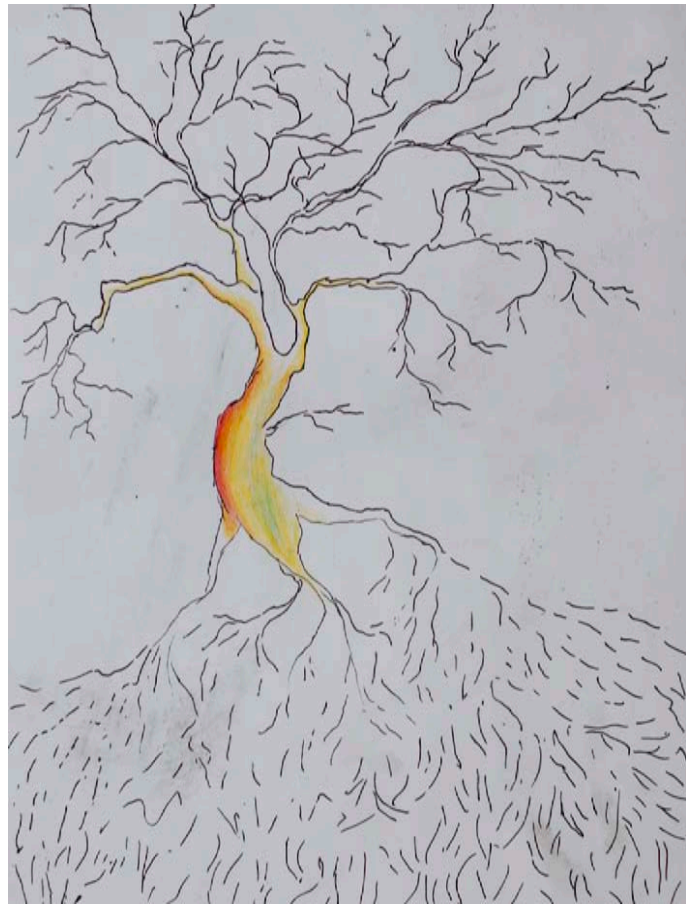

For my map, I named a bunch of places I love, and drew them all as buildings centering at a cartoon version of me. Furthermore, I added quotes that come to mind when I think of the place. I chose to keep the lines and overlap the colors, too.

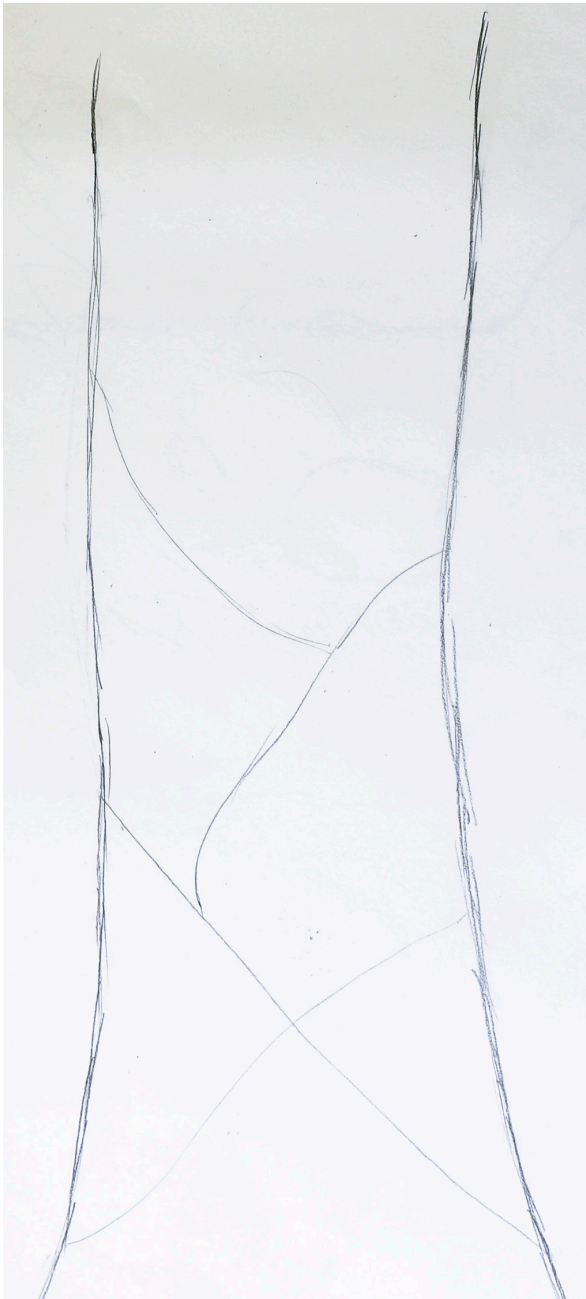

My map is meant to be a quick "guide" for different types of places in State College. The different circles show what type each building is. It isn't comprehensive, just some of my favorites (the best!)

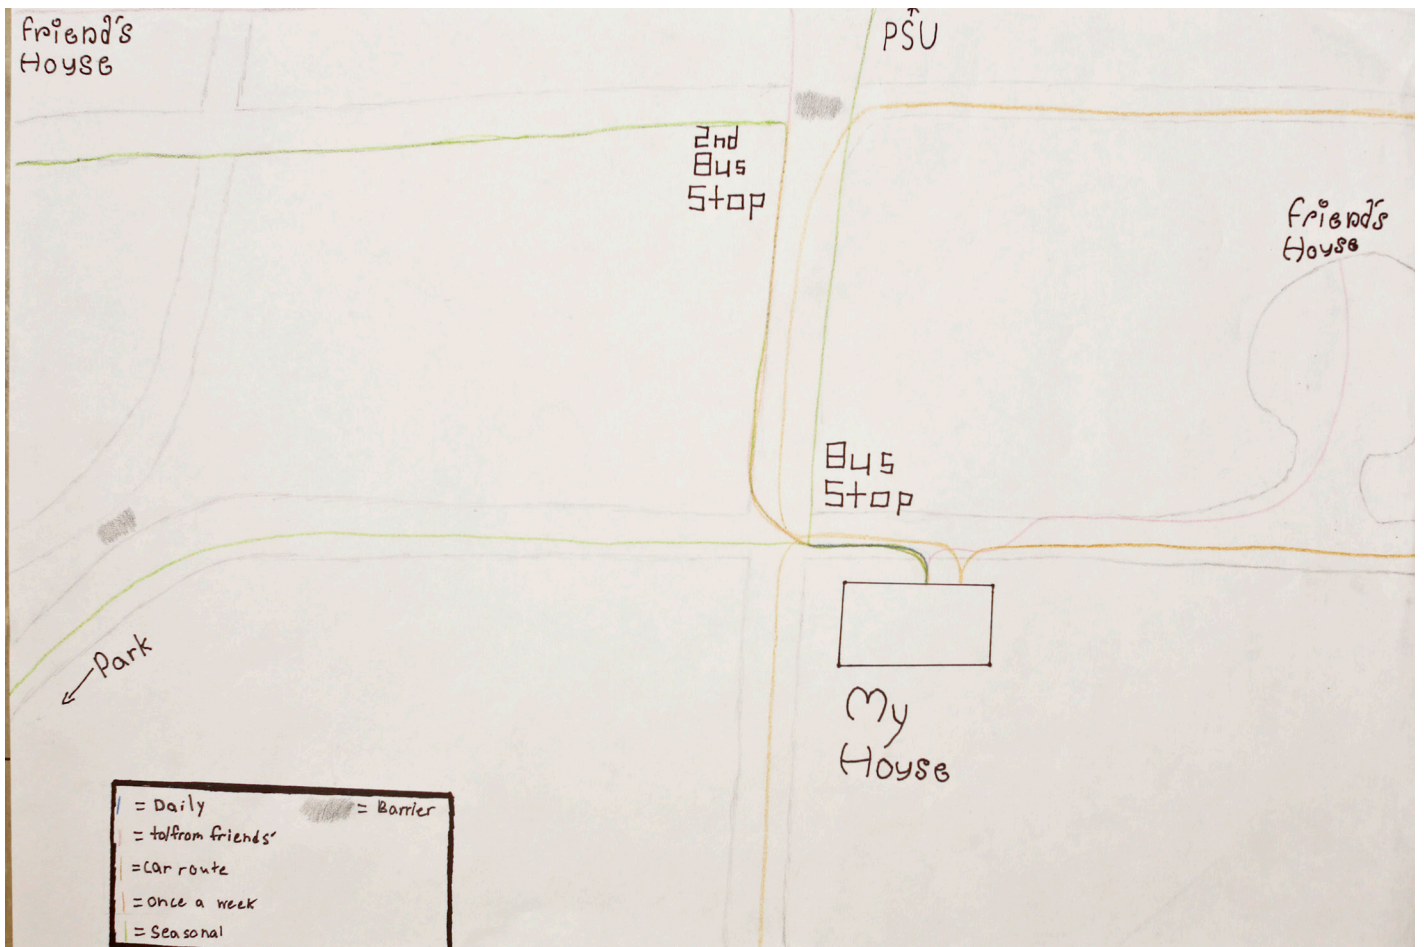

PS: IF you haven't eaten at Indian Pavilion, you haven't lived.

My reflection is about my tree. 12/10  
My tree is about  
the woods. The  
woods has many of  
trees and my tree  
is one of the  
prettiest ones. it's  
fabulous! ALSO,  
tha tha has nothing  
to do with it. SO, my  
tree is from the  
majestical woods in  
which hauni-horse  
has been cursed  
by. I'm just kidding.  
So my tree shows  
the beauty of  
the quiet woods.  
That's it.

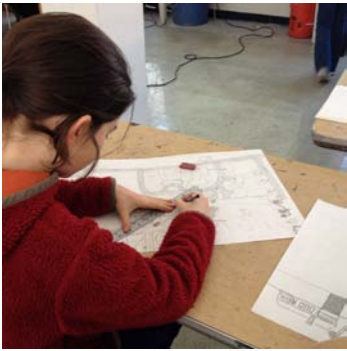

My map is what I view my neighborhood as. I drew the routes that I take in my area with varying regularity, also drawing the destination. The only house that I drew was my own since it's the starting point of all the routes. I included and excluded what I did because that is how I view ~~my~~ my neighborhood.

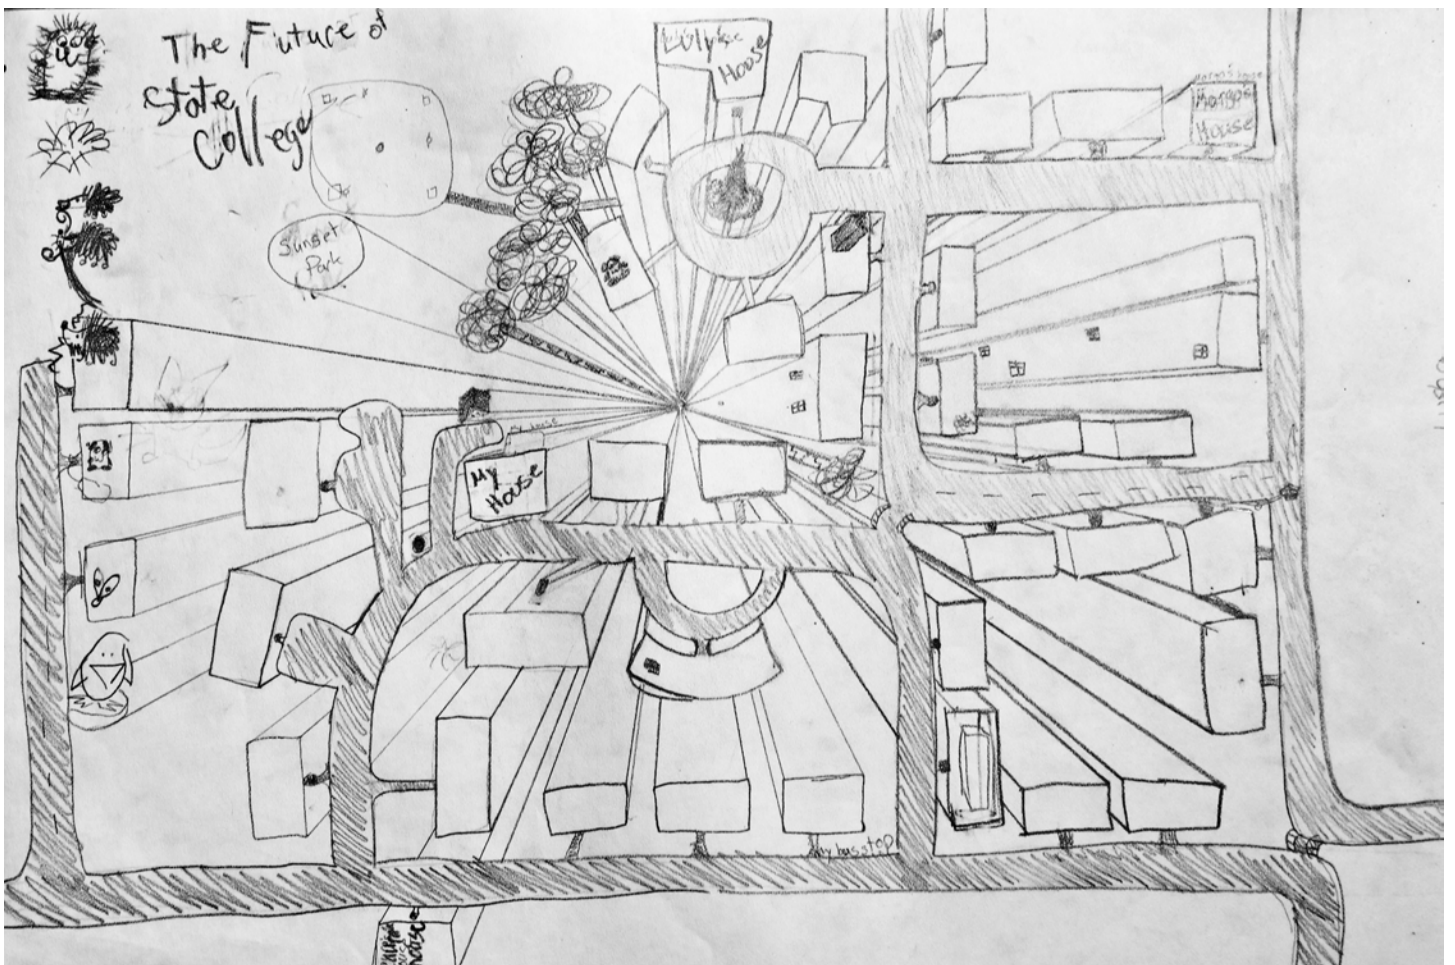

I drew the artists collage on my shirt. When someone looks at my T-shirt I want them to see what the house looks like.

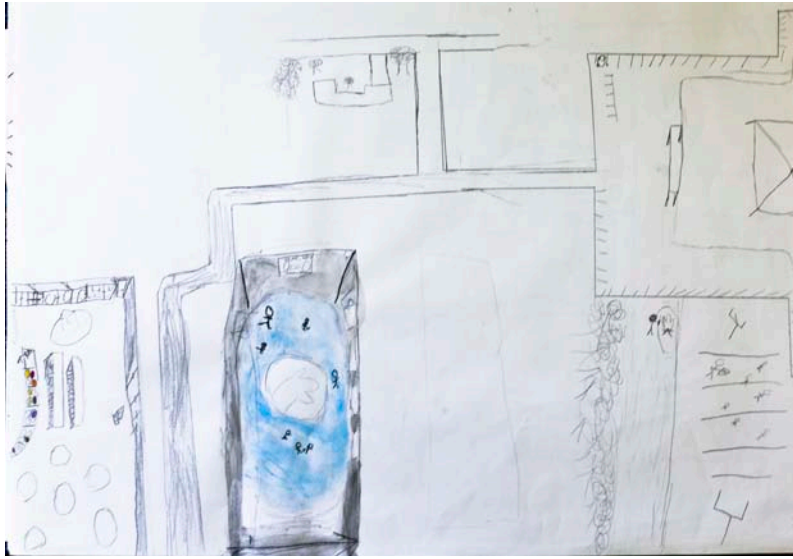

On my map, I drew the houses and places around my house. I made because I did, the buildings look like they're high up, and the roads are flying. I did that because we were learning about perspective, and I wanted people to know about where I am.

These are the places I have  
the most memories in PennState.  
At Brice Jordan Center  
there is Winter Jam. Beaver  
Stadium, Football. At Pegula  
Ice arena, Ice skating.

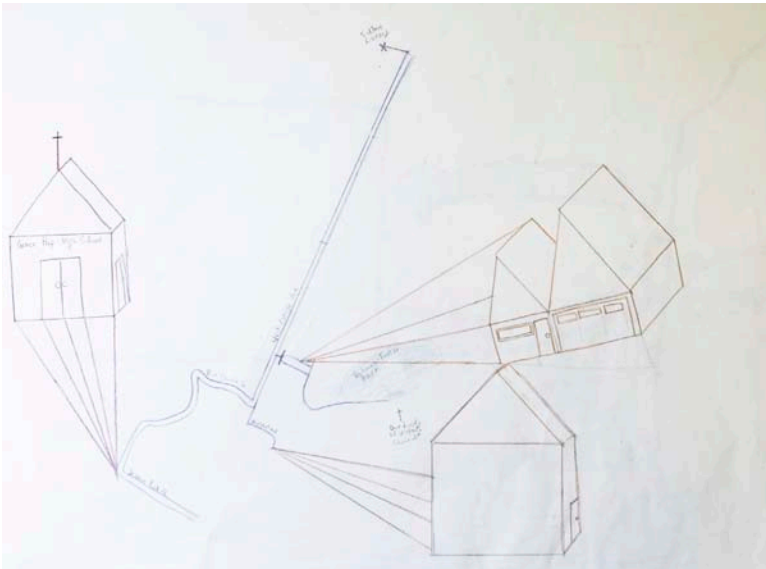

I put CALI GIRL on my shirt Because I am from CA! I have a lot of memories there! Also my half of my team lives there and I was Bone there too!

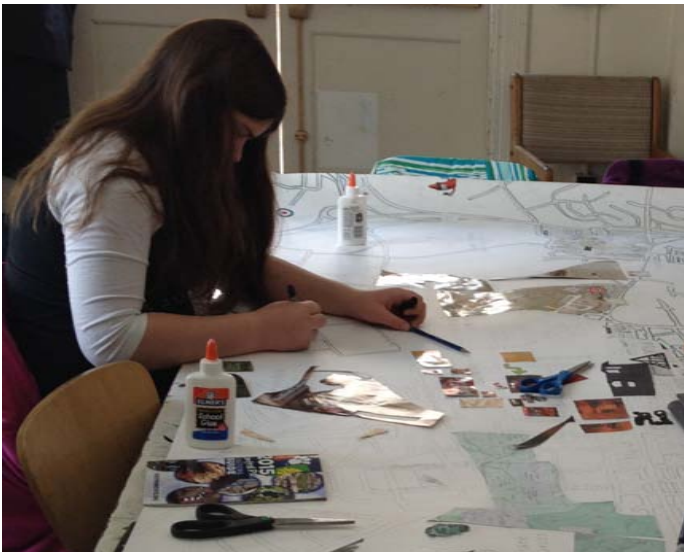

For the map, I chose Schlow Library because of its significance and impression in the community. For the physical structure, I made a rough sketch on black paper in 2-point perspective, and added details such as window holes and more lines. The cutout was based on an online picture of the library, which best represented its structure and composition.

The things/places I put onto the map was either important or special to me. I grew up around this area, but I was born in Russia. I moved from Russia to USA when I was little. I've lived in the same area ever since I was ~~Born~~ Brought here. I've meet all my friends here and made memories too. So Pleasant Gap is a pretty special place to me. I have been going to the same school also for all my life. Bellefonte area high. All the places I have drawn on the map are places that I like to hang out. Doesn't matter if it is the movies, quarries, cave, the mall or at friends houses. I also put down the places that my parents work. also I drew were I go shopping and eating.

I never got to finish my map, but in the end it would have shown the places I spend most of my time. Each and every place I spend time at has some significant meaning to me.
